SOFTWARE PROJECTS

Boba Tracker

[Github](#) | [Boba](#)

-Keep track of your bubble tea purchases so you can remember what you liked and try out others' boba orders.

-Made with React, React Bootstrap, CSS, Express, MongoDB

Chatroom

[Github](#) | [Chatroom](#)

-Live-updating chatroom that allow users to send, edit, and delete their own messages. Also implemented Admin roles to help manage the messages.

-Made with Bootstrap, CSS, HTML, JS, Express, MongoDB

Yeet into the Void

[Github](#) | [Void](#)

-“Note” taking app that lets you collect your thoughts and throw (yeet) them into space with a fun animation.

-Made with Bootstrap, CSS, HTML, JS, Ruby on Rails

Tic Tac Toe

[Github](#) | [Game](#)

-A front-end in-browser game that allows users to challenge themselves to games of tic-tac-toe. Keep track of how many games played.

-Made with Bootstrap, CSS, HTML, JS, jQuery

EXPERIENCE

General Assembly, Boston, MA — Software Engineering Fellow

July 2019 - October 2019

-Completed a full-stack Software Engineering Immersive using industry best practices and a variety of languages, technologies, and frameworks.
-Collaborated with teams to problem-solve and develop a variety of apps.
-Created 4 projects within deadlines and requirements that allow users to create, read, update, and delete resources in a single page application.

Boston Public Schools, Boston, MA — Elementary Educator

August 2013 - June 2019

-Collaborated within and across grade level teams (2nd to 7th) to provide differentiated learning experiences using a variety of resources with a focus on STEM.
-Communicated regularly with staff and families through phone, email, educational apps, and newsletters to provide additional resources to support student learning.
